MILEON®

A professional solid marble interior firm **MILEON** uses excellent process-ability, various colors, high-quality texture, and outstanding formability with creative designs to make the best spaces only for you.

WELCOME

MILEON is a specialized product brand of solid marble.

MILEON is a brand created from confidence and belief of continuous and various launching of products from accumulated technology by predicting market and customer needs in advance. This belief of the brand began in 2005.

MILEON® is a material that embraces diversity by applying various patterns through the technology we have developed through continuous research and development. It is also the material that enhances the space like the 'cosmetics for the interior' and also creates a refined interior space. It is an excellent material capable of creating an infinite and creative design. We will continue to expand its use to the advanced interior decoration and the production of various interior accessories.

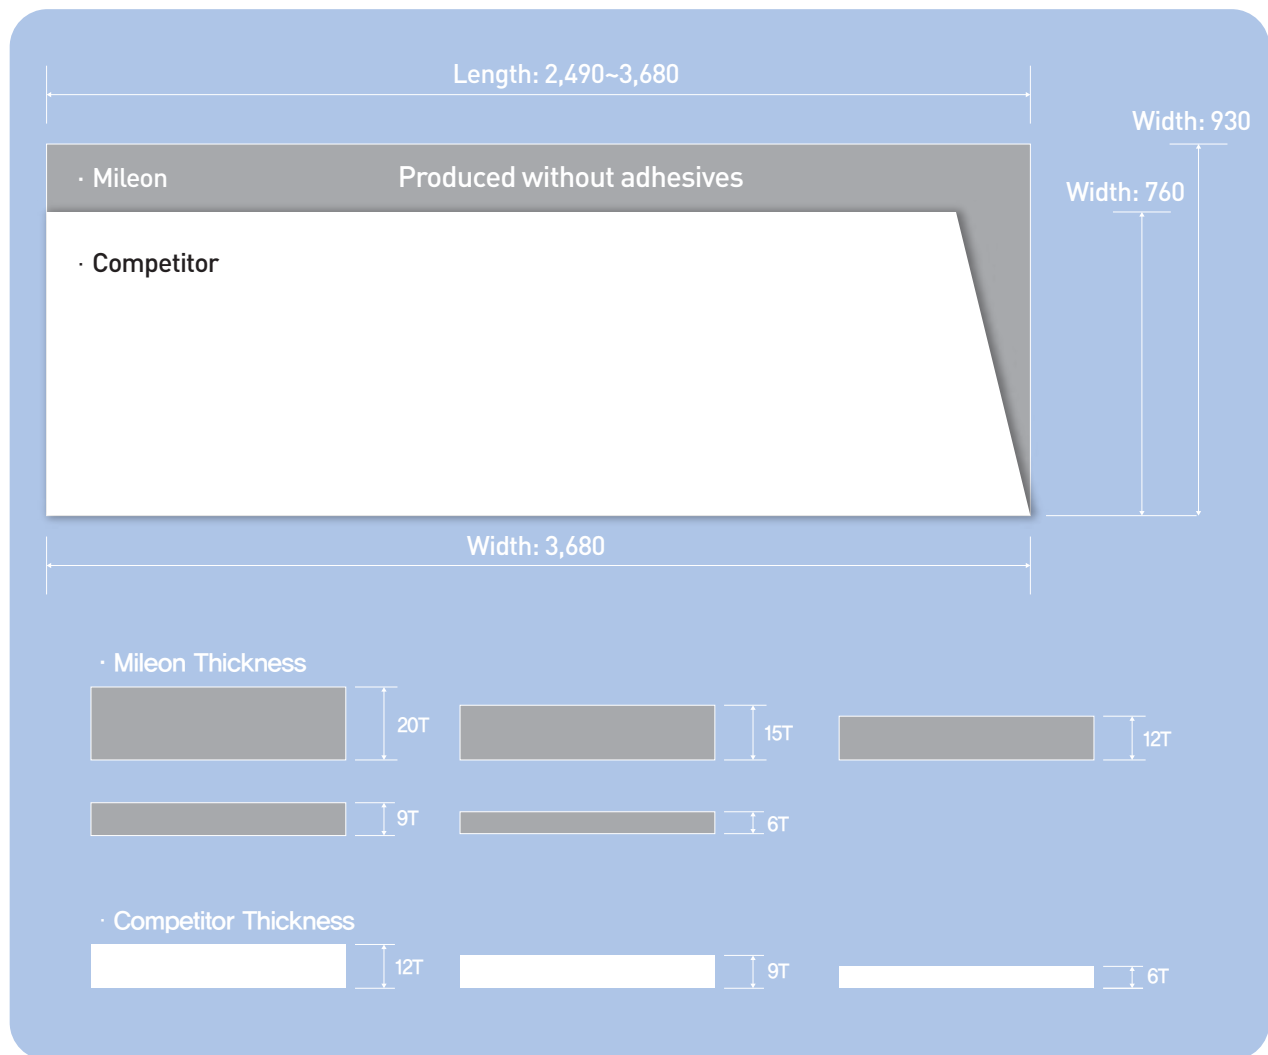

MILEON® Milleon will meet the needs of the market and customers, rewarding their support with continuous development of raw materials and new products. Also, we will be a brand that rewards customers at home as well as in the global market with products of new and advanced designs.

Give us your interest and support.
Thank you.

MW · MILEON®

① Features (Specialized Broad Width Products / Variable Specifications)

Item	Thickness	Width	Length	Remarks
Mileon	20T, 15T, 12T, 9T, 6T	760 ~ 930	2,490~3,680	Broad Width, Thickness
Competitor	12T, 9T, 6T	760	3,680	Ordinary Width

② Strengths of Broad Width Products

- Produced without adhesives, incorporated into island kitchen
- Applied to places 760mm tall such as the information desk, etc.
- 2-step counter
- Wall Panel: (Regular Size: 760mm) $1 + \alpha$ (Broad Width: 930 - Regular Width: 760) _ Information Desk, 2-step Counter, 9T products easily applied as wall panels
- Lengths varied to meet customer needs to reduce loss

> What is solid marble?

① About Products

Acrylic resins of MMA (Methyl Methacrylate) and inorganic substances are mixed to make this organic solid marble. On organic substances like MMA (Methyl Methacrylate) resin, fillers like ATH (Aluminum Trihydroxide), surface treatment agent, cross-linking agent, hardener, coloring agent, and other additives are put, and they are hardened with thermoplastic acrylic resins. Thereafter, they are compressed and fabricated into plate forms, and these plates are grinded, cut, and processed to become products of various textures and designs.

② Product Characteristics

While solid marble is not as strong as natural marble, more various colors, shapes, designs, and patterns are available from solid marble. Moreover, antibacterial treatment to restrain bacteria propagation, outstanding processing formability, and other great advantages make it to be demanded by many places.

> Use of solid Marble Products

Formability	<ul style="list-style-type: none"> As it may be easily bent, glued, cut, and processed, it may have the feeling of natural marble and various forms of designs at the same time.
Stability	<ul style="list-style-type: none"> It is thermally stable as it has heat resistance, water resistance, weather-proofness, and UV stability. It contains chemical stability against acid, alkali, discoloration of organic substances, and deformation. It holds pollution-proofness not to be discolored easily by materials in a daily life.
Uniformity	<ul style="list-style-type: none"> As surface and cross-sectional materials are same materials, even if materials are worn out, the patterns are kept to make management and maintenance to be easy, and even if materials are damaged, the same external looks may be restored.
Easy Management and Maintenance	<ul style="list-style-type: none"> Unlike materials laminated or coated, it is highly water-proof and has uniform surface and internal materials. Water may not penetrate, cleaning is easy, and it is recoverable to the initial state after surface damage or scratch.
